Total Wall Clear Mastic #11 is an adhesive for all rigid and semi-rigid insulation materials.

Total Wall Clear Mastic #11 is a high solids 100% acrylic compound, which has low odor, low toxicity and contains no solvents.

Total Wall Clear Mastic #11 produces a permanent superior bond to a wide variety of substrates including wood sheathing, masonry, and gypsum sheathing.

---

**Features**

- Easy to use, premixed in the pail
- Meets VOC, VOS requirements
- Does not create a vapor barrier
- Bonds quickly and permanently
- Environmentally safe, Non-Toxic
- Exterior or Interior use

**Coverage**

- 200 to 275 sqft per 5gallon pail on smooth surfaces
- 150 to 225 sqft per 5gallon pail on rough surfaces
### Application
The substrate must be firm, dry and free of loose debris, oils or any substance that would interfere with bond. The substrate should conform to T-Wall Exterior Insulation Finish System Specifications, or Foundation Insulation Specifications. Total Wall Clear Mastic is applied directly out of the 5-gallon pail.

If the Total Wall Clear Mastic is too thick for the application, add a few ounces of water to the pail and mix with a low speed mixer.

- **Ribbon and Dab Method**
  Using a steel trowel, apply a 2” wide by 3/8” deep band of Total Wall Clear Mastic around the perimeter of the rigid insulation board. Apply evenly spaced trowel length dabs, 3/8” thick of Total Wall Clear Mastic to the center area of the insulation board. At least 1/3 of the area of the backside of the board should now be covered with Total Wall Clear Mastic. Do not apply adhesive to the edges of the insulation.

- **Notched Trowel Method**
  Cover the entire back of the insulation board with Total Wall Clear Mastic using a 3/8” notched trowel. Immediately press the insulation board onto the substrate with firm, even pressure. In rare cases, it may be necessary to temporarily tack or fasten the insulation board to the substrate until the Total Wall Clear Mastic has set.

### Maintenance
If an area of Exterior Insulated Finish System (EIFS) that has been adhered with Total Wall Clear Mastic becomes dirty or stained, clean with a mild cleaner solution and low-pressure spray rinse. For scars, broken or damaged areas, repairs should be made with the same EIFS products and Clear Mastic.

### Precautions
T-Wall Clear Mastic is an alkaline water based material. Do not ingest. Avoid contact with skin and eyes. In case of contact, flush with water. For precipitation is forecast within 8 hours of application. Do not apply if the temperature cannot be maintained above 40F for 24 hours. Shelf life in closed containers is 18-24 months when stored at 50-100F. Keep containers sealed and under cover when not in use.
