Total Lastic Premier is our highest quality Elastomeric coating.

Total Lastic Premier can be applied directly to concrete, concrete block, EIFS finishes, wood, asbestos shingles and other surfaces with or without the use of a primer.

Total Lastic Premier provides a waterproof, attractive finish that has elasticity to bridge old and new cracks.

Total Lastic Premier has patented DPR for added mildew resistance and dirt pickup.

Total Lastic Premier is available in a smooth (non-textured) base, a fine texture (50 mesh) base, and medium (30 mesh) texture base.

**Features**

- Meets VOC, VOS requirements
- Permanent elasticity bridges cracks
- Does not create a vapor barrier
- Weather resistant
- Resists dirt, mildew / non-chalk-

**Coverage**

**Coverage (smooth base)**
- Porous substrates: 80-120 sq.ft./gal /coat
- Non-porous substrates: 120-150 sq.ft./gal/coat

**Coverage (textured base)**
- Porous substrates: 60-100 sq.ft./gal /coat
- Non-porous substrates: 100-130 sq.ft./gal/coat

Application
Prepare surface by removing any dirt, oils, loose debris or any substance that may interfere with the bond. A dry surface is preferable but a slightly damp surface is acceptable. Glossy surfaces should be lightly sanded prior to application.

It is advisable to fill any spalled or broken areas of substrate with a suitable patching material. Roll or brush over any cracks before coating the entire wall. Any cracks greater than 1/32” should be filled with a paintable grade acrylic or single component urethane caulk sealant and allow to cure 4 hours before beginning coating.

Stir product for one minute with a low speed mixer or manually stick-stir as desired. Do not beat excessive air into the product. Apply T-Wall Lastic Premier by roller, brush or airless sprayer.

For airless sprayer, use a reversible tip with a #35 orifice-spraying tip.

For roller application, a 3/4” nap roller produces good results. The nap thickness can be varied to compensate for the substrate characteristics and the desired appearance. Thin product with up to 5-ounces of water per gallon if needed.

For waterproofing, two 12-15 mil (wet) coats are recommended. When spray applying Total Lastic Premier, it is suggested that the first coat is back-rolled to achieve the best results.

Handling and Storage
Do not apply to frozen or saturated surfaces. Do not apply if precipitation is forecast within 8 hours of application. Do not apply if the temperature cannot be maintained above 40F for 24 hours. Shelf life in closed containers is 12-18 months when stored at 50-100F. Cleanup with water or soapy water before drying.

Maintenance
If Total Lastic becomes dirty or stained, clean with a mild cleaner solution and low-pressure spray rinse. For scars or hard to clean stains, recoat with T-Wall Lastic.

Precautions
Total Lastic is an alkaline water based material. Do not ingest. Avoid contact with skin and eyes. In case of contact, flush with water. For contact with eyes, get immediate medical attention in addition to flushing. Wear safety glasses and protective clothing. Keep out of reach of children and pets.
